

Express Dictate

Digital Dictation Software

Express Dictate software is a voice recording program that works like a dictaphone. It lets you use your PC or Mac to send dictation to your typist by email, Internet or over the computer network.

- Professional dictation voice recorder
- Works like a traditional dictaphone
- Send dictation instantly via the Internet
- HIPAA compliant secure encryption

**Record and send dictation
directly from your
computer**

Improve Turnaround Time

This digital dictation software can dramatically improve turn-around time and lets you work wherever you want. It is quicker to send, higher quality and more reliable than traditional dictation options. It will also keep track of the progress of work and expected completion time.

Digital Recording Features

- Digital audio recording with superb signal processing quality
- Record to wav, mp3, or dct formats
- Automatic non-destructive editing with multiple record modes including record-insert, record-overwrite, and record-at-end
- Voice activated recording, so long silences are not recorded
- Assign priority to individual dictations
- Ability to prompt for patient or file data before recording starts
- Send recordings directly to a typist immediately by email, over a computer network or via FTP (Internet) or save to your hard drive
- Supports encryption, perfect to secure patient, or client data for transmission over the Internet (HIPAA compliant)
- Dock analog or digital handheld dictation recorders and transmit recordings made when away from your computer
- View work progress or recover sent dictations
- Audio compression to reduce file and transmission size
- Can be controlled by system-wide hot keys (so you can record while working in other screens)
- Hand controllers or foot pedals can be used when dictating
- Easy-to-use interface so you can be dictating in just minutes

Works with Your Existing Dictaphone

As an alternative to dictating at your computer you can also use your existing portable dictaphone or other digital dictation recorder while you are away from your computer. The Express Dictate *'Dock'* feature lets you transfer the dictation quickly and easily and send it to your typist electronically.

System Requirements

- Works on Windows Vista, XP, Windows 7 and 8
- Mac OS X 10.3 or above
- Microphone & Speakers (or Headset or Handset Controller)
